MULTI-OS SUPPORT

From enrolling devices for use on your corporate network, to configuring settings and managing data access, to deploying and managing apps, FAMOC provides a solid foundation for managing multi-OS devices with ease and efficiency.

and more

EFFICIENT AND COST EFFECTIVE TRACKING SOLUTION

Improve work allocation and customer service

Location tracking has always been a key feature of the FAMOC mobility management platform.

FAMOC gives you an efficient and cost effective tracking and monitoring solution to oversee mobile workforce, besides standard MDM security policies and app management capabilities.

FAMOC administrator can see a group of devices on the map or a single device location history by daterange.

Location and geofencing is a feature especially popular in these industries:

transport and logistics

retail

healthcare

REAL-TIME DATA WITHIN REACH

Make the best decisions with monitoring dashboard

It is said that whoever has the data, has the power.

Information is the most valuable resource and an important asset for every company. With FAMOC EMM, all collected data about mobile devices are clear and easily accessible from the main dashboard.

Track, analyse and make the best business decisions based on quantitative data presented on user-friendly charts.

The Monitoring Dashboard provides views and tools for graphically presenting essential mobile fleet data about issues and current state of employees devices.

Monitoring dashboard is a feature especially popular in these industries:

insurance

financial services

public

SUPPORT DEVICES IN THE FIELD

Instant support anytime, anywhere

Let's imagine a situation when one of your specialists, who works in the field, has a sudden problem with a smartphone. Miles away from your headquarters, with a broken device.

Or think about even worse situation – your CEO is on a business trip abroad. Suddenly, you get a call and hear: "Andy! My smartphone is dead! I need my calendar, Email, Evernote! Help me!". A hard nut to crack, isn't it?

With FAMOC, you can remotely access devices quickly, regardless of their location and time zone.

It improves business processes and reduces device downtime.

Remote support is a feature especially popular in these industries:

energy/oil

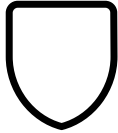

consulting

banking
